Material Covered:

Sections Covered: Chapter 1-5 – Bring it to class daily.
This course prepares students for their second course in Algebra. Topics include: Real numbers, Linear Equations & Inequalities, Linear Systems, Exponents, Polynomials, & Graphing.

Objectives:
We will have a balance approach to mathematics utilizing computational skills, conceptual understanding and problem solving.

1. Evaluate various mathematical relations including signed numbers and numbers.
2. Solve polynomials, adding, subtracting, multiplying, and dividing.
3. Set up and solve word problems.
4. Operate with exponential properties.
5. Simplify radical expressions and solve radical equations.
6. Produce linear graphs, inequality graphs and double linear equations graphs.
**SLO's:** As a result of this learning experience a student can:
1. Illustrate by graphing where lines intersect;
2. Diagram integral powers of a set of variables.
3. Apply discipline, reasoning, and organizational skills necessary for additional courses in Math and other disciplines.

**Math Lab:** Students enrolled in this course are required to spend about 1.25 hours each week in the Math Lab for a total 18 hours by semester’s end. 
**Location:** Tec 190.  **Hours of operation:** MTWTH: 8am-8pm. Free tutoring and workshops are available. Also: Free Online-tutoring programs. **Last day to complete your 18-hour obligation is Thursday Dec. 10.**

**Homework:** Homework will be assigned every meeting and it is to be done daily. An assignment submitted late **will not** receive any credit. **Staple** the homework in order, with last name first, chapter, and section numbers. Clearly label each section at the top right of each page. Write your **Roster #** on the upper right hand corner on everything you turn in.

Steps for success in math:

1. Buy your book today! And bring it to class daily! (2 copies in library & 1 in my office during office hours)
2. Attend class regularly and be on time ready to learn.
3. Ask questions.*
4. Find a quiet place to do your work.
5. Before you attempt your homework: Read your book carefully, work out the examples in the book, Reread your class notes and practice the examples worked in class.
6. Start your homework soon after class.
7. Completing the homework and studying are different. After completing the HW, go back and review (study) the major ideas that have been presented thus far.
8. Learn from your mistakes and successes. When you receive your quizzes/Tests (regardless of what the score is), find time to re-do them. Re-do your Tests 3 to 5 times on weekends until you know the information well.
9. Prepare for each test.
10. Attend office hours/Math Lab.
11. NEVER GIVE UP!
